

Valves for HVAC

L&T Valves manufactures a wide range of flow-control solutions for the HVAC industry. Our association with the industry is over five decades long, and many innovations we introduced have grown to become industry standards.

The latest innovation from L&T Valves is Aquaseal Plus Class 150 Butterfly Valve, specifically designed to address the higher line pressures that modern high-rise building systems demand. Reliability is built into each valve through a world-class quality management system. Aquaseal Plus has successfully completed over 10,000 test cycles, living up to its fit-and-forget reputation.

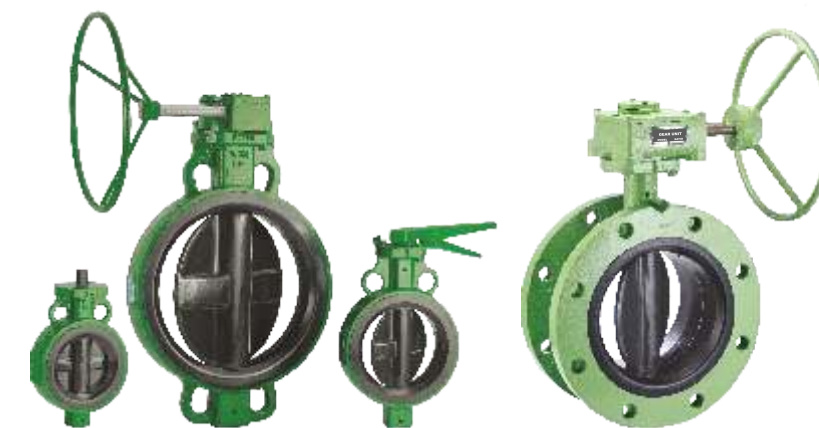

L&T Valves also offers Aquaseal PN 10 Butterfly Valves, Aquaseal Chek Dual-plate Check Valves and Soft-seated Ball Valves that complement Aquaseal Plus. The entire range delivers unmatched performance over a long service-life, and can be supplied with actuators and accessories.

L&T valves are available through a countrywide network of offices and distributors. Get in touch with us today. Let L&T Valves put you in control.

Butterfly Valves

- Class 150 & PN 10, In sizes up to 36"
- Wafer-type & double-flanged
- Integrally-moulded seat
- Options of seat and discs materials to suit customer requirements
- Pneumatic and electrical actuation options

Dual-plate Check Valves

- Retainer-less design
- Wafer-type
- Cast Iron, In sizes up to 12"

Floating Ball Valves

- One, two & three-piece designs, In sizes up to 12"
- Soft-seated & metal-seated
- Pneumatic and electrical actuation options

L&T Valves Limited (formerly Audco India Limited) is a wholly owned subsidiary of Larsen & Toubro. Backed by a fifty-year track-record of excellence and world-leading innovation, the company provides engineered flow-control solutions for key sectors of the economy such as oil & gas, power, petrochemicals, chemicals, fertilizers and pharmaceuticals.

The valves are designed using state-of-the-art 3D design, simulation and analysis software. Finite Element Analysis (FEA) and Computational Fluid Dynamics (CFD) are used to fine-tune product performance. Rigorous prototype tests - both in-house and at advanced flow control research establishments - ensure that the customised solutions meet customer expectations.

L&T Valves is synonymous with world-class manufacturing and quality assurance systems. Our plants have the agility and flexibility to deliver a wide variety of valves against time constraints and dynamic customer demands. International safety, health and environment standards govern every phase of the manufacturing process.

The distribution network of L&T Valves spans the globe, partnering some of the largest valve distribution companies in the world. In India, L&T Valves has a presence in all major industrial centres through a network of offices, authorised stockists, automation centres and service franchisees.

Larsen & Toubro is a USD 14 billion technology, engineering, construction, manufacturing and financial services conglomerate, with global operations. Its products and systems are marketed in over 30 countries worldwide. L&T is one of the largest and most respected companies in India's private sector. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business over seven decades.
